

CALLAWAY SPORTTRUCK

Callaway SportTrucks pack more power than ever before: up to 560 HP! The "GenThree" Supercharger System, originally designed by Callaway engineers for the C7 Corvette, is now standard equipment in Callaway Sierras, Yukons and Yukon XL's. Plus, the System's new Triple-Element Intercooling virtually eliminates power loss due to heat saturation. Callaway SportTrucks deliver breathtaking power and stump-pulling torque with perfect drivability, bulletproof durability, and 50-state emissions compliance (per CARB E.O. D-319-10).

These limited production trucks and SUV's are built with a full complement of Callaway standard equipment. To further customize your SportTruck, Callaway options are also available.

Callaway's 3 year/36,000 mile Warranty supplements the GM Bumper-to-Bumper Warranty, providing the best coverage of any aftermarket manufacturer. Callaway Sierras, Yukons and Yukon XL's are assembled to stringent engineering specifications by expert technicians exclusively at Callaway factories in Old Lyme, Connecticut, and Santa Ana, California. For more information, please visit callawaycars.com or call us toll-free at 866 927 9400.
