

AEROWAGEN

A Callaway option for your Corvette Coupe . . .

In the tradition of coach-built shooting brakes, Callaway offers the AeroWagen package for the C7 Corvette Coupe. Its components can be fitted to the standard production C7, the Callaway SC627 Stingray or Grand Sport, or the Callaway SC757 Z06.

The Callaway AeroWagen™ hatch assembly is a part-for-part replacement of the original equipment Corvette rear hatch, using the original hardware and latching mechanisms. It operates in an identical fashion.

About Callaway cars and trucks.

The cars and trucks presented here represent our company's on-going investment in technology, efforts in manufacturing, and commitment to excellence in craftsmanship. We develop products that produce stunning power, yet our design philosophy dictates that we meet or exceed OEM quality, durability, and emissions compliance.

Starting with General Motors' finest vehicles, we focus our efforts on the features and characteristics that address the demands of the discriminating enthusiast driver. We provide "powerfully engineered" enhancements that cannot find their way into large scale production.

We trust that you can appreciate all that goes into building these very special machines, and the passion for performance that we share with our owners.

John Callaway

Every Callaway car, pickup and SUV has a bit of Callaway Competition's thirty-year tradition of winning race cars inside.
