Introducing Callaway’s latest “powerfully engineered” pickup truck: the mid-sized Callaway Colorado SC410*. Equipped with Callaway’s intercooled, TVS1740-based supercharger, high-flow intake and exhaust systems, and precise electronic powertrain management calibration, Callaway Colorados deliver significant increases in horsepower and torque. That means improved acceleration, towing and hauling. Plus, Callaway’s inlet air path bypasses the supercharger’s compressor section during idle, deceleration and cruising to minimize engine load and maximize fuel economy.

Sold, serviced and financed by your local Chevrolet dealer, Callaway Colorados are ready for your purchase now. These limited production pickups come with an array of Callaway standard equipment. Plus, several Callaway options are offered to further customize your truck.

All Callaway Colorados are constructed to stringent engineering specifications by expert technicians in our Connecticut and California factories.

With flawless drivability and bulletproof durability, Callaway’s 3 Year/36,000 Mile Limited Warranty overlaps the factory GM warranties, providing the most comprehensive coverage of any aftermarket manufacturer.

* Net horsepower and torque ratings are pending final vehicle validation.
