

2017-2022 Callaway Canyon

SC **410**

Powerfully engineered.

The mid-sized Callaway Canyon SC410 is ready for wherever you want to go. Elevation, AT4 or Denali: all three trim levels are equipped with Callaway's intercooled, TVS1740-based supercharger, high-flow intake and exhaust systems, and precise electronic powertrain management calibration. The integrated package gives GM's DOHC 3.6L V6 engine significantly increased horsepower and torque for improved acceleration, towing and hauling potential. Plus, Callaway's inlet air path bypasses the supercharger's compressor section during idle, deceleration and cruising to minimize engine load and maximize fuel economy.

Sold, serviced and financed by your local GMC dealer, Callaway Canyons are ready for your purchase now. These limited production pickups come with an array of Callaway standard equipment. Plus, several Callaway options are offered to further customize your truck.

All Callaway Canyons are constructed to stringent engineering specifications by expert technicians in our Connecticut and California factories. With flawless drivability and bulletproof durability, Callaway's 3 Year/36,000 Mile Limited Warranty overlaps the factory GM warranties, providing the most comprehensive coverage of any aftermarket manufacturer.
