

Callaway Sierra 1500 SC602

Producing 602 horsepower and 560 lb-ft of torque, new Callaway Sierras deliver stunning acceleration and impressive hauling power. These 2019 to 2022 models are based on GMC's Sierra 1500 pickups equipped with SLT, AT4 or Denali trim and 6.2L engines.

Callaway's new TVS R2650-based GenThree™ supercharger provides 15% more displacement than the previous design while requiring 18% less power input. That means more power with less parasitic drag. A high flow air intake system supplies added air to the supercharger inlet while the new, low-restriction dual exhaust system provides ample flow for the newfound power and an authoritative acoustic signature without droning resonance inside the cabin. Callaway's "CalCal" bespoke engine control components and powertrain calibration integrate the premium performance components, ensuring perfect drivability, emissions compliance and warranty retention. In fact, Callaway's 3 Year/36,000 Mile Limited Warranty supplements the factory GM warranties, providing the most comprehensive coverage of any aftermarket manufacturer.

Unlike one-off "tuner" projects, all Callaway cars and trucks are constructed by expert craftsmen at Callaway's California and Connecticut factories, according to well-defined engineering specifications and conforming with OEM-level assembly practices.

Sold, serviced and financed by your local GMC Dealer, new Callaways are ready for your purchase now. Or, if you already own a 2019 to 2022 Sierra 1500 with a 6.2L, we can transform your GMC to Callaway specifications. Call us at (860) 434-9002 to speak with our staff.
